EMC TEST REPORT

Test sample description:

Product name: 2V used in storage gel battery

Type/ Model:

JGFM100-2/JGFM200-2/JGFM300-2/JGFM400-2/JGFM500-2/JGFM600-2/JGFM800-2/JGFM1000-2/JGFM1

500-2/JGFM2000-2/JGFM3000-2

Trade mark (if any): N/A

Applicant:

Jiangsu Oliter Energy Technology Co.,ltd No.88 North outer ring Road Gaoyou Jiangsu,China

Manufacturer:

Jiangsu Oliter Energy Technology Co.,ltd No.88 North outer ring Road Gaoyou Jiangsu,China

Additional information (if necessary)

Test result:

The equipment comply with the requirements according to the following standard(s)

EN61000-3-2:2006+A2:2009EN61000-3-3:2013

	CE		
Date of issue: July 16	, 2014		
Test by :Jack	Willeste Co. Little Co	Approved by : _	Stephan Lv Stephan Lv

PASS

- 1	៷	١
/	1	•

Procedure deviation: NONE

Non-standard test method: NONE

Test result: PASS

General remarks:

This report shall not be reproduced except in full without the written approval of the testing laboratory

The test presented in this report relate only to the item(s)tested

"(See Annex#)" refers to an annex appended to the report

Throughout this report a comma is used as the decimal separator

Test Summary:

Conducted Emissions		P
Radiated Emission 30MHz to 1000MHz		P
Electrostatic discharge immunity test		Р
Radiated, radio-frequency electromagnetic field electromagnetic field immunity test	EN 61000-3-2: 2006+ A2: 2009	P
Electrical fast transients/burst immunity test		P
Surge immunity test	EN 61000-3-3: 2013	P
Immunity to conducted disturbances, induced by radio-frequency fields		P
Power-frequency magnetic field immunity test		N/A
Voltage dips, short interruptions and voltage variations immunity tests		P

Possible test case verdicts

test item does the requirement		P
--------------------------------	--	---

Note The EUT does not contain any component which is susceptible from the magnetic field.

_test case does not apply to the test item ----- N/A

_test item does not meet the requirement ----- N

Part 1: Emission of electromagnetic disturbance

1.1 Mains Terminal Continuous Disturbance voltage

Test Results: PASS

1.1.1 Mains Terminals Continuous Disturbance voltage, 150K Hz to 30M Hz

Frequency Range: 150K Hz to 30M Hz

Test date: "Lwn('38.'4236 Class/severity: Class A

Detector: Peak for pre-scan (9kHz Resolution Bandwidth for 0.15-30MHz)

Quasi-Peak if maximised peak within 10dB of Quasi-Peak limit

1.1.2 Limits

Frequency range (MHz)	Limits	dΒ (μ _V)
(14112)	Quasi-peak	Average
0.15 ~ 0.5	78	63
0.5 ~ 30	71	61

1.1.3 E.U.T. Operation

Operating Environment:

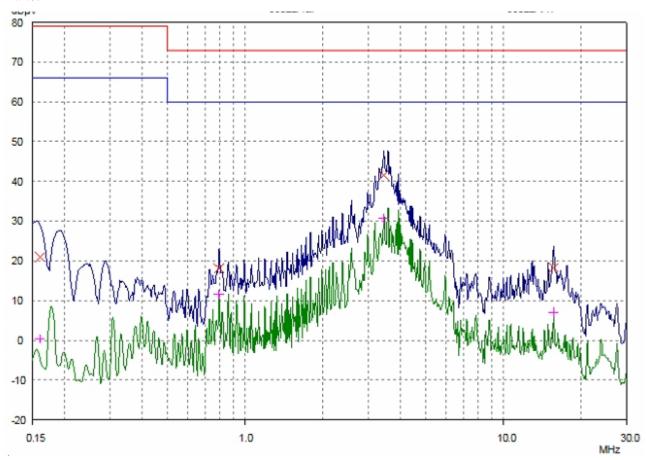

Temperature: 26°C, Humidity: 68%RH, Atmospheric Pressure: 1005MPa EUT Operation: Test EUT is the in representative work according to standard

1.1.4 Test result(include test data and test curve):

An initial pre-scan was performed on the live and neutral lines with peak detector. Quasi-Peak and Average measurement were performed at the frequencies with maximized peak emission were detected

L line:

Frequency MHz	Receiver QP Level (dBuV)	Limit (dBuV)	Margin (dB)	Receiver AV Level (dBuV)	Limit (dBuV)	Margin (dB)
0.16	*	78.00	*	*	63.00	*

[&]quot;*" means the emission level is 6dB lower than the relevant limit.

1.2 Radiated emission

Test result: PASS

1.2.1 Radiated emission limit from frequency range 30MHz - 1000MHz

Frequency Range: 30M Hz to 1000M Hz

Test date: """Lwn("38."4236 Class/severity: Class A

Limit: 50.0 dBµV/m between 30MHz & 230MHz

57.0 dBµV/m between 230MHz & 1GHz

Detector: Peak for pre-scan (120kHz resolution bandwidth)

Quasi-Peak if maximized peak within 6dB of limit.

1.2.2 E.U.T. Operation

Operating Environment:

Temperature: 25°C, Humidity: 68%RH, Atmospheric Pressure: 1005MPa EUT Operation: Test EUT is the in representative work according to standard

1.2.3 Test result (includes test data and test curve)

An initial pre-scan was performed in peak detection mode. Quasi-Peak was performed at the frequencies with maximized peak emission were detected

1.3 Test Instruments

Name	Model/Type	Manufacturer	Valid time of calibration	Used

Part 2: Immunity to electromagnetic disturbance

Section 2: Immunity Test Results

2.1 Test procedure:

EN 61000-4-11: 2004 EN 61000-4-2: 2009 EN 61000-4-4: 2004 EN 61000-4-5: 2006

EN 61000-4-6: 2009

2.2 Test Results:

EN 61000-4-2: 2009	Criteria A	PASS
EN 61000-4-4: 2004	Criteria B	PASS
EN 61000-4-5: 2006	Criteria A	PASS
EN 61000-4-6: 2009	Criteria A	PASS
EN 61000-4-11: 2004	Criteria A	PASS

2.3 Test instruments:

Name	Model/Type	Manufacturer	Valid time of calibration	Used
Impulse Generator	NDG 2050	SCHAFFNER	2014.11.30	$\sqrt{}$
Pulse coupling network	CDN31	SCHAFFNER	2014.11.30	√
Fast transient/Burst Generator	NSG2050	SCHAFFNER	2014.09.17	V
RF Generator	NSG2070	SCHAFFNER	2014.09.24	√
Coupling and decoupling network	CDN M316	SCHAFFNER	2014.09.24	V
ESD Generator	NSG 438	SCHAFFNER	2014.09.07	√

2.4 Performance Criteria Description:

- : The equipment shall continue to operate as intend. No degradation of performance or less of Α function is allowed below a performance level specified by the manufacturer
- В : After the test the equipment shall continue to operate as intend. No degradation of performance or less of unction is allowed after the application of the phenomena below a performance level specified by the manufacturer.
 - During the test, degradation of performance is allowed. However, no change of actual operation state or stored data is allowed
- C : Loss of function is allowed, provided the function is self recoverable or can be restored by the operation of the controls by the user in accordance with the manufacturers instructions

2.5 Results of Electrostatics discharge Test (ESD)

Discharge Impedance :330 Ohm/150pF

Discharge Voltage :Contact discharge 8KV

HCP,VCP 4KV

Polarity : Positive/Negative

Number of discharge : 10 times/each Polarity at each test point

Discharge Mode : Single Discharge Discharge Period : 1 second minimum

2.5.1 E.U.T. Operation:

Operating Environment:

Temperature: 26°C, Humidity: 68%RH, Atmospheric Pressure: 1008MPa EUT Operation: Test EUT is the in representative work according to standard

2.5.2 Direct Application Test Results:

Test Point:

1. All insulated enclosure & seams around EUT.

2. All touchable metal material of EUT

Direct Application			Test Results	
Discharge	Polarity	Test maint	Contact	A in disahansa
Level(kv)	+/-	Test point	Discharge	Air discharge
8	+/-	1	N/A	A
4	+/-	2	A	N/A

2.5.3 Direct Application Test Results:

Test Point: All side

Indirect Application			Test Results	
Discharge	Polarity	Tost maint	Horizontal	Vertical
Level(kv)	+/-	Test point	coupling	Coupling
4	+/-	1	A	A

Results Α : No degradation in the performance of the EUT was observed.

> N/A : Not Applicable

Note: The lower lever test also is satisfied.

2.6 Results of electrical Fast Transient(EFT)

Basic Standard : EN 61000-4-4

Source voltage and frequency :AC240V/50Hz, single phase

Polarity : Positive/Negative

Impulse frequency : 5KHz Tr/Tn : 5/50ns Burst : 15ms/300ms Test level : 0.5 kV

Test duration : 2 minute per Level & polarity

Observation:

2.6.1 E.U.T. Operation:

Operating Environment:

Temperature: 26°C, Humidity: 68%RH, Atmospheric Pressure: 1008MPa EUT Operation: Test EUT is the in representative work according to standard

2.6.2 Test Results

Lead under Test	Level (±kV)	Coupling Direct/Clamp	EUT operating mode	Observations (Performance Criterion)
Live	±0.5	Direct	POWER ON	Performance Criteria A
Neutral	±0.5	Direct	POWER ON	Performance Criteria A
Live, Neutral	±0.5	Direct	POWER ON	Performance Criteria A

Remark:

- Α : The equipment shall continue to operate as intend. No degradation of performance or less of function is allowed below a performance level specified by the manufacturer
- В : After the test the equipment shall continue to operate as intend. No degradation of performance or less of unction is allowed after the application of the phenomena below a performance level specified by the manufacturer.
 - During the test, degradation of performance is allowed. However, no change of actual operation state or stored data is allowed
- C : Loss of function is allowed, provided the function is self recoverable or can be restored by the operation of the controls by the user in accordance with the manufacturers instructions

2.7 Results of surge Test:

Basic Standard : EN61000-4-5

Pulse Repetition Rate : 30 secs

Polarity : positive /Negative, $\pm 5ea$

Phase angle : 0, 90, 270 degrees

Coupling mode : L to N for differential mode

L to PE, N to PE for common mode

: 0.5KV for differential mode Severity levels step

0.5KV for common mode

Observation Description

2.7.1 E.U.T. Operation:

Operating Environment:

Temperature: 26°C, Humidity: 68%RH, Atmospheric Pressure: 1008MPa EUT Operation: Test EUT is the in representative work according to standard

2.7.1 Test result:

С	Phase Angle(degree)	Polarity	Test Level(kV)	Results
L-N	0, 90, 180, 270,	+/-	0.5	A
L-PE	0, 90, 180, 270,	+/-	0.5	A
N-PE	0, 90, 180, 270,	+/-	0.5	A

Results:

- Α : The equipment shall continue to operate as intend. No degradation of performance or less of function is allowed below a performance level specified by the manufacturer
- В : After the test the equipment shall continue to operate as intend. No degradation of performance or less of unction is allowed after the application of the phenomena below a performance level specified by the manufacturer.

During the test, degradation of performance is allowed. However, no change of actual operation state or stored data is allowed

 \mathbf{C} : Loss of function is allowed, provided the function is self recoverable or can be restored by the operation of the controls by the user in accordance with the manufacturer's instructions

2.8 Conducted disturbance

:EN61000-4-6 **Basic Standard** Frequency range : 0.15MHz~80MHz

Field strength : 3V/rms

Modulation : AM 80%, 1Khz Sine wave

Frequency step : 1% of fundamental

Dwell Time : 2 seconds

Coupling Method: : CDN M316 3Line

Observation:

2.8.1 E.U.T. Operation:

Operating Environment:

Temperature: 26°C, Humidity: 68%RH, Atmospheric Pressure: 1008MPa EUT Operation: Test EUT is the in representative work according to standard

2.8.2 Test result:

Cabal Description	Frequency(MHz)	Observation
AC input	0.15~80	A

Results:

Α : The equipment shall continue to operate as intend. No degradation of performance or less of function is allowed below a performance level specified by the manufacturer

В : After the test the equipment shall continue to operate as intend. No degradation of performance or less of unction is allowed after the application of the phenomena below a performance level specified by the manufacturer.

During the test, degradation of performance is allowed. However, no change of actual operation state or stored data is allowed

C : Loss of function is allowed, provided the function is self recoverable or can be restored by the operation of the controls by the user in accordance with the manufacturers instructions

2.9 Radiated Immunity (80MHz to 1GHz)

Basic Standard : EN61000-4-3

Frequency range : 80MHz~1000MHz

Field strength : 3V/rms

Modulation : AM 80%, 1Khz Sine wave

: 1% of fundamental Frequency step

Dwell Time : 2 seconds

Coupling Method: : CDN M316 3Line

Observation:

2.9.1 E.U.T. Operation:

Operating Environment:

Temperature: 26°C, Humidity: 68%RH, Atmospheric Pressure: 1008MPa EUT Operation: Test EUT is the in representative work according to standard

2.9.2 Test result:

Pass

EC Declaration of conformity

Council 2004/108/EC Electromagnetic compatibility

Jiangsu Oliter Energy Technology Co.,ltd No.88 North outer ring Road Gaoyou Jiangsu,China

Certify that the product described is in conformity with the Directive 2004/108/EC Electromagnetic compatibility

as amended

Product Name: 2V used in storage gel battery

No:JGFM100-2/JGFM200-2/JGFM300-2/JGFM400-2/JGFM500-2/JGFM600-2 JGFM800-2/JGFM1000-2/JGFM1500-2/JGFM2000-2/JGFM3000-2

The product has been assessed by the application of the following standards: EN 61000-3-2: 2006+ A2: 2009 EN 61000-3-3: 2013
